

AA SCREENING DETERMINATION

Of

Letterkenny Water Supply Zones, Lead in Drinking Water Mitigation Plan, Co. Donegal.

In accordance with Article 6(3) of the EU Habitats Directive (Directive 92/43/EEC) and Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, Irish Water has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the project, individually or in combination with other plans or projects is likely to have a significant effect on European Site(s).

The proposed project involves the installation of a banded phosphoric acid storage tank, dosing installations housed in kiosks, facilities to raise the pH of the water to the recommended pH of 8.0, and associated works within the Ballymacool Water Treatment Plant site boundary. The scope of the operational works includes the dosing of Orthophosphate to treated water at Goldrum and Ballymacool Water Treatment Plants.

In this context, particular attention was paid to the European Site(s) listed below:

- *Tranarossan And Melmore Lough SAC (000194)*
- *Sheephaven SAC (0001190)*
- *Ballyhoorisky Point to Fanad Head SAC (001975)*
- *North Inishowen Coast SAC (002012)*
- *Mulroy Bay SAC (002159)*
- *Leannan River SAC (002176)*
- *Lough Swilly SAC (002287)*
- *River Finn SAC (002301)*
- *Derryveagh and Glendowan Mountains SPA (004039)*
- *Lough Fern SPA (004060)*
- *Lough Swilly SPA (004075)*
- *Lough Foyle SPA (004087)*
- *Fanad Head SPA (004148)*
- *Horn Head to Fanad Head SPA (004194)*

In accordance with Regulation 42(7) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, **Irish Water has made a determination following screening that an Appropriate Assessment is not required** as the project is not directly connected with or necessary to the management of the sites as European site(s) and **as it can be excluded**, on the basis of objective

information and in light of the conservation objectives of the relevant European Site(s), **that the project, individually or in combination with other plans and projects, would have a significant effect on a European Site.**

This determination is based on the nature, location, scale and duration of the proposed works, including any temporary works and excludes any consideration of mitigation measures.

Full records of the assessment, reports, surveys, consultations, and observations are held by the competent authority and available for public review as requested.

Signed:

JOHN CASEY

CHIEF TECHNICAL ADVISOR
